## CAREER OBJECTIVE

Information Systems student at UIT with hands-on experience writing Node.js scripts to collect data from APIs, normalize it, and store it in SQL/NoSQL databases. I have built REST APIs and automated data ingestion pipelines using Node.js, MongoDB, PostgreSQL, and Python, and I am comfortable working with Git in a team setting. I am eager to grow into a Backend / Data Engineer role and to gain hands-on experience with Kafka, MinIO, Docker, and large-scale data pipelines on real production projects.

## SKILLS

### Node.js / JavaScript / TypeScript

REST API development, scripts to collect data from APIs, automation, and data ingestion pipelines

### Databases

MongoDB (NoSQL), PostgreSQL (SQL) – schema design, querying, normalization, and storage

### Python

Data collection, processing, and ETL scripting using Pandas, NumPy, Selenium, NLTK

### Data Processing

Data ingestion, cleaning, normalization, and pipeline automation

### Tools & Version Control

Git, REST APIs, Cloudinary (media ingestion via API), Spreadsheets

### Learning / Familiar

Kafka, MinIO, Docker, distributed data pipelines – basic understanding, actively learning

## PROJECTS

### University Exam Question Bank

2/2026 – 4/2026

Teaching Assistant Project – UIT

- Built a REST API backend using Node.js and MongoDB for a searchable university exam question bank.
- Wrote a Node.js ingestion script that calls the Cloudinary API to upload hundreds of exam images, then normalizes and stores the returned URLs and metadata into MongoDB.
- Implemented a synchronized deletion feature across storage and database to maintain data integrity and consistency.

### Hotel Reviews Data Pipeline

6/2025 – 11/2025

- Designed and built an automated data collection pipeline using Python and Selenium to gather unstructured data at scale.
- Implemented a processing stage to clean, filter, normalize, and structure raw text (NLTK) for downstream use.
- Stored the processed dataset in PostgreSQL, making it queryable for analysis and model training.
