CAREER OBJECTIVE

I am a second-year student at the University of Information Technology (UIT) with a strong passion for working with data and uncovering the stories behind numbers. I have built a solid foundation in data processing through hands-on research and academic projects. I am actively seeking a Data Analyst internship or entry-level position where I can apply my analytical skills, contribute to data-driven decision-making, and continue growing as a professional.

EDUCATION

VNUHCM – University of Information Technology (UIT)

2024 – Present

Bachelor of Information Systems

WORK EXPERIENCE

University of Information Technology (UIT)

11/2025 – Present

Research Assistant

- Scraped a large dataset of social media comments about travel trends using Python and Selenium.
- Cleaned, filtered, and labeled text data using the Natural Language Toolkit (NLTK) to prepare it for machine learning applications.
- Stored structured data into PostgreSQL for downstream analysis.

PROJECTS

Hotel Reviews Assistant

6/2025 – 11/2025

- Created an automated web scraping pipeline using Python and Selenium to extract unstructured social media comments about hotels.
- Cleaned, filtered, and labeled raw text data using NLTK to prepare it for machine learning applications.
- Stored the cleaned and structured data into PostgreSQL.

University Exam Question Bank

2/2026 – 4/2026

Teaching Assistant Project – UIT

- Built a searchable exam question bank using Node.js and MongoDB to organize and retrieve academic materials.
- Developed a script to categorize and store hundreds of exam images into Cloudinary and saved metadata with generated URLs into MongoDB.
- Implemented a synchronized deletion feature to maintain data integrity and keep the database current.

SKILLS

SQL	Proficient in querying, joining, and aggregating relational databases
Python	Pandas, NumPy, Matplotlib, Selenium, NLTK for data processing and automation
Data Visualization	Tableau – building dashboards and visual reports from structured data
Spreadsheets	Google Sheets / Excel for data cleaning, formulas, and pivot analysis
Database Management	PostgreSQL, MongoDB – data modeling, storage, and retrieval
Data Processing	ETL pipelines, web scraping, text preprocessing, data labeling

CERTIFICATES

Google Data Analytics Professional Certificate	5/2026
Google / Coursera	

ACTIVITIES

RMIT Neo Culture Technology Club	4/2026 – 5/2026
Competitor – NEON LEAGUE	
• Competed against more than 100 teams and successfully advanced to the Top 20 finalists. • Conceptualized an innovative IoT device designed to collect and analyze environmental data.
